

DTV Multicast

Advanced and customized digital television via fiber optics or coax

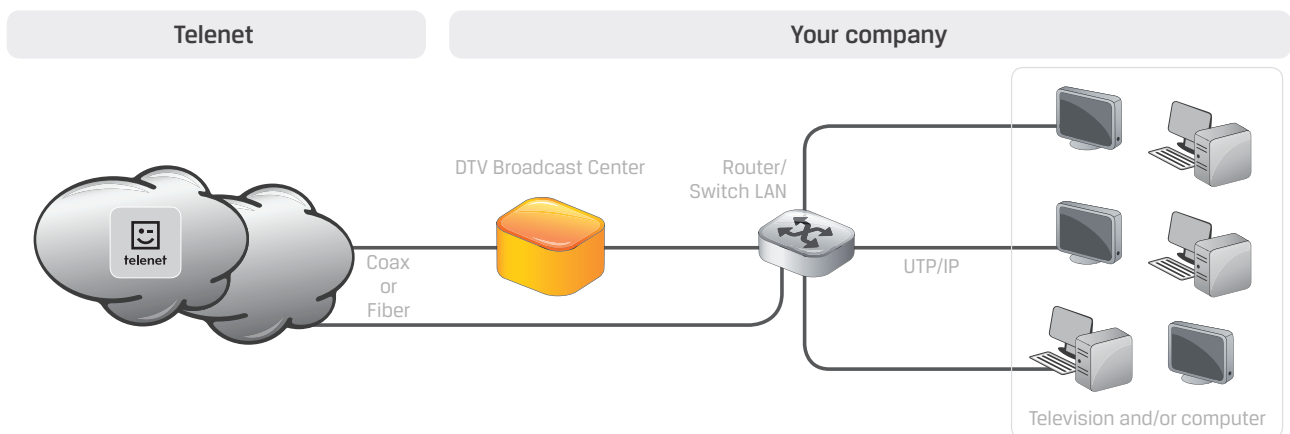

DTV Multicast is a revolutionary television solution for companies and organizations with more than 50 TV sets. Connection to the Telenet network is possible via our fiber-optics or coax cable. The digital signal is distributed via IP over your internal LAN network. Utmost suitable for integration with other systems.

Advantages

- > Future-oriented, stable and scalable fiber-optics solution
- > Also connectible via a standard TV cable (coax)
- > Redundant connection via fiber-optics is possible
- > Available throughout Belgium
- > Unlimited number of TV connections
- > Superior digital picture and sound quality
- > Wide selection of channels
- > No separate box on top of the set necessary
- > Integration of local multimedia applications and/or telephony (VoIP) is possible
- > Managed installation of the TV connection
- > Business Service Desk

DTV Broadcast Center

- > For organizations that are connected to our network via coax
- > Distributes the digital TV signal centrally to the TV sets
- > Becomes the property of your company
- > Supplied with a 2-year warranty
