

High-speed Internet over fiber

iFiber is the fastest connection on the market with maximum flexibility. Fiber-optics lets you connect directly to the Telenet IP backbone, which provides you with a superior Internet access with high bandwidths. iFiber is available in Belgium and Luxembourg.

Advantages

Guaranteed quality

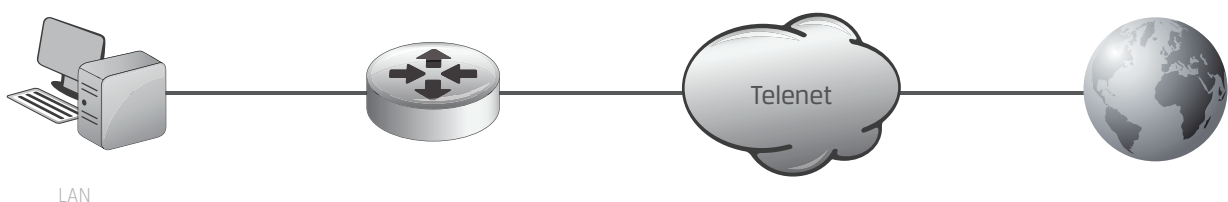

- › Fiber-optics access of impeccable quality
- › Fixed and symmetrical connections
- › Guaranteed bandwidth up to 1 Gbps
- › Unlimited data volume (downstream and upstream)
- › Unlimited number of users
- › Fixed monthly charges
- › Flexible upgrade procedure

Utterly reliable

- › Service Level Agreement (SLA) with top-quality guarantees and online reporting
- › Redundancy of the fiber-optics access
- › Redundancy on IP level with the option of two iFibers

Interesting options

- › Possibility to exceed your fixed bandwidth (settled afterwards according to usage volume)
- › Managed router and/or firewall security
- › Real time reporting of performance and the consumed bandwidth
- › Registration, transfer and full management of your domain(s)

LAN

Telenet

Specifications

iFiber

Access technology	Fiber-optics	
Bandwidth	Downstream/upstream guaranteed	1 Mbps - 1 Gbps on Ethernet interface
		128 kbps - 155 Mbps on serial/SDH interface
Technical specifications	› Maximum number of users	Unlimited
	› Type of IP address	Fixed
	› Standard number of IP addresses	8
	› Transfer volume	Unlimited
	› Portal restrictions	Unlimited
	› VPN client	Possible
	› VPN server	Possible
	› Mailboxes	-
	› Web space	-
	› Antivirus	-
	› Anti-spam	-
SLA	› Availability	Depends on fiber redundancy
	› Backbone performance	Availability, packet loss, delay
	› Recovery time	Depends on fiber redundancy
	› SLA reporting	Standard included

Backup line

	› Included	-
	› Access technology	Fiber-optics, coax or VDSL
	› Bandwidth	Depends on the access technology
	› Management	By Telenet

Options

	Purchase router
	Manage router
	Lease router
	Purchase Firewall
	Manage Firewall
	Extra IP addresses
	DNS services
	Real-time reporting
	Ethernet
	Domains .be / .com / .org / .net / .name / .biz / .info / .eu
	ISDN back-up
